

REFERENCES

We are Cloud Technologies – we provide data for targeting online ads, powering campaigns for the world’s largest brands. Our high-quality data is also used in tools driven by artificial intelligence algorithms. We used our proprietary technology to create an audience data cloud. It includes digital information on 5 billion users from over 200 markets worldwide. As a fast-growing company, we have been recognized in rankings such as Deloitte Technology Fast 500 EMEA, Deloitte Technology Fast 50 CE, and Financial Times 1000 Europe’s Fastest Growing Companies. As a publicly traded company on the Warsaw Stock Exchange (GPW), we focus our investment activities on markets with high growth potential that create value for shareholders.

A key consideration in our search for an accounting firm was finding a business partner that not only demonstrates broad knowledge and professionalism but also shows dedication to our concerns. Due to our capital group structure, the consolidation of financial statements, and periodic reports to the GPW, we needed solid support as well as tools that facilitate information exchange.

We can count on JWW to meet the deadlines for submissions, which is crucial for stock exchange reporting. Clear communication from the entire team allows us to save time and focus on our tasks. Thanks to the solid foundation that JWW provides us, we can concentrate on what we do best, knowing that the matters of the Cloud Technologies group are in the hands of specialists.
