

DS Engineering

Att.: to whom it may concern

Wrocław, 5th August 2021

Reference

DS Engineering is a company that is a part of the Danish DS Gruppen, and our specialty is the design of steel structures. We employ qualified civil engineers who comprehensively prepare documentation for the construction of facilities for various purposes such as agricultural, industrial, sports and commercial. We primarily cooperate with contractors from northern and western parts of Europe.

Our cooperation with JWW Accounting Office began in 2019 when the company started its operations and we have been satisfied with the quality of their service since then. JWW experts manage settlements for us in accordance with the budget cost schemes as well as in line with the framework agreement. As an experienced accounting office, they efficiently carry out the accounting of work in progress, prepare financial statements in English and provide the necessary support to a growing company.

We are fortunate to have such a reliable, responsible, and trustworthy business partner. JWW's services can be used without hesitation by enterprises with foreign capital groups that care about the security of their accounts and professionalism of a high level.

Best Regards
DS Engineering
