REFERENCES

We offer complete design services such as architectural and interior décor. The principles that are important to us in our day-to-day work are consistency, transparency and efficient communication. Together, we work with clients at every stage of the investment, starting with the very first ideas, through analyses, different concepts and designs, ending with construction supervision and coordination. We developed our cooperation model by establishing it on dialogue, partnership and trust. We had been looking for an accounting office which shares similar values and that's why we chose JWW.

Our successful cooperation has been going on since 2016, when JWW specialists comprehensively managed the introduction of our company to the market and consistently carried out the registration process of the company. We could also be sure of professional representation during the inspection.

JWW manages JASTAA's accounting books and provides HR services. We recommend this accounting office as they are experienced and reliable experts who perfectly book documents, prepare all official declarations and provide solid support.
