

## LETTER OF RECOMMENDATION

PayEye is a company from Wrocław that entered the market with a revolutionary idea that changed the way we've been dealing with electronic payments. Our vision is implementing biometric system which nowadays is the fastest, most secure and convenient way of identifying the user and confirming cashless transactions.

Considering an unusual business area of the company, we've been looking for a partner that has a broad enough knowledge from different fields of activities. We wanted our consulting services to be reflected in optimization of business activity costs and for the bookkeeping strategy to clearly show us our financial situation. We want to particularly recognize the communication with the whole team that almost always is able to answer our questions. Without any doubt, JWW met our requirements in these matters.

From the very beginning, JWW accounting office has been leading the company through a series of procedures, acting as our representative that was in touch with the office's authorities at all times. Our cooperation has so far confirmed that our choice of an accounting office was a good call.

A handwritten signature in blue ink, appearing to be "Kulczycki".
