Bluewayme is a team of professionals who has built the competences of its members during the many years they have spent in the automotive field, business consulting and the IT industry. We combine knowledge with passion, and therefore, we can meet the expectations of companies which use and manage fleets. Thanks to a number of already implemented projects, Bluewayme wants to build a conscious and responsible, while at the same time modern and closer to the clients, range of values and tools. Caring for the natural environment and making travel easier are the key elements of our business model, and the benefits of them can be applied in building personal relationships.

We decided to work together with the JWW Accounting Office, because the day-to-day assistance of a dedicated team of specialists is of crucial importance to us. In JWW, we see a partner who, just like us, combines the experience with commitment and consequently, meets the needs created by the market.

JWW embraces challenges, uses unconventional solutions and modern communication tools and as a result, guarantees its position and assures us that we have made the right decision by choosing them as our business partner. We can implement our business ideas feeling completely safe, because our matters are supervised by a competent team.

Mariusz Puto
