LETTER OF RECOMMENDATION

Our company was established as a start-up in 2013 and since then has been going through a period of dynamic development. In just a few years, we have transformed a simple web analytics tool into a professional marketing platform for international corporations. Today, as Microsoft's gold partner, we already employ more than 100 people.

JWW has been accompanying us since 2016, taking comprehensive care of accounting and human resources matters. At such a rapid growth rate, we needed an accounting office that could flexibly adapt to the changes that were taking place. We decided to make use of JWW services and we are extremely happy with this choice.

The company provides excellent quality accounting service. JWW specialists flawlessly create the necessary documents, timely prepare tax accounts, and prepare monthly management reports.

In addition to accounting, JWW also handles all personnel and payroll issues of our company, which is a crucial asset for us - especially with such a large number of employees.

We recommend the JWW accounting office as a reliable partner to all companies that are betting on rapid growth and the acquisition of new markets. JWW employees are trustworthy, experienced professionals who can be relied on in any situation.
